

Experimental Report

Experimental concept: the amounts of cancer cells will decrease by using Nion Negative Ion Generator to irradiate.

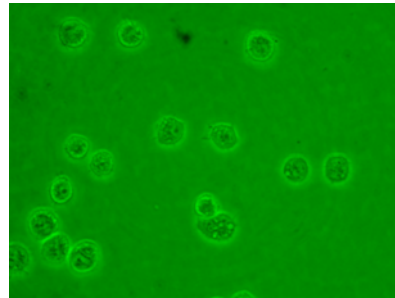

Experimental organization: Chung-Shan Medical University

Control group
(Didn't use the generator)

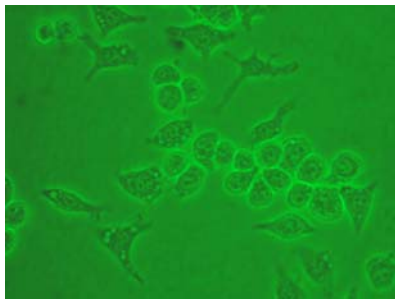

(Photograph 1) 24 hours later, enlarge 400 times.

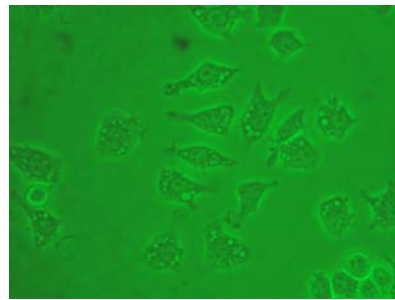

Experimental Group
(In the beginning, use the generator to irradiate for thirty minutes)

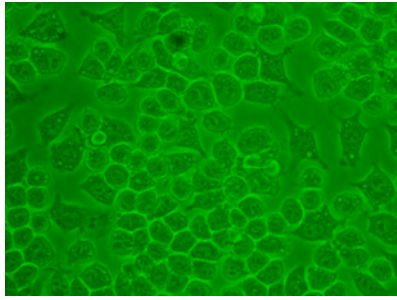

(Photograph 2) 24 hours later, enlarge 400 times.

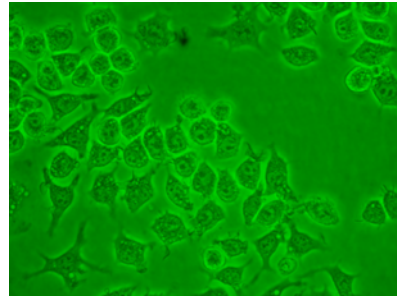

(Photograph 3) 48 hours later, enlarge 400 times.

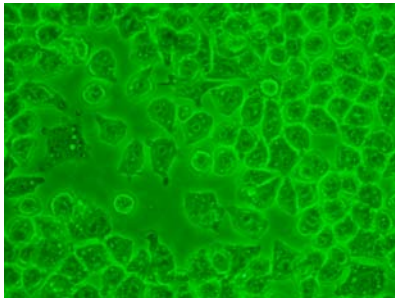

(Photograph 4) 48 hours later, enlarge 400 times.
